

PUTNEY & WOOD LTD

The Stonework Contractor | Contemporary | Traditional

PROJECT PROFILE:

280 High Holborn,
Chichester House, London WC1

- **Client:** Hines UK
- **Architect:** GMW Architects
- **Main Contractor:** Mace
- **Material used:**
Moleanos and Thala Beige
- **Value:** £450,000
- **Completed:** September 2012
- **Contract duration:** 26 weeks
- **Scope of work:**
External cladding, new build and internal flooring

280 High Holborn is a seven storey mixed use development between Holborn and Chancery Lane. Retail units are provided at the ground floor level with a self contained residential complex and 63,000 sq ft of office accommodation on the upper floors.

As part of the stonework package, awarded by main contractor Mace, Putney & Wood's in-house design team interpreted GMW's conceptual drawings to create detailed drawings of the stonework on each elevation. Following design, Putney & Wood's project team sourced the specified limestones and hand fixed each one individually.

"I was very pleased with Putney & Wood's performance on this project and I'd have no problems using them on future stone jobs"

John Fraser – Mace Group
