

PUTNEY & WOOD LTD

The Stonework Contractor | Contemporary | Traditional

Alderman's House, London EC2

“Putney and Wood provided a good quality installation, good communication throughout the project and worked with us at all stages including pre-contract and mock-ups, to deliver a great scheme and quality product. Their positive approach to challenges during design and on-site combined with excellent workmanship ensured we met our tight deadlines.”

Graham Ardley of ISG

Client:	Amsprop
Architect:	Rolfe Judd
Main Contractor:	ISG
Material used:	Portland stone, Belgian Blue limestone and Lazonby sandstone
Value:	£1.4m
Completed:	March 2017
Contract Duration:	36 weeks
Scope of work:	External stone cladding

The Crosspoint, formerly Alderman's House, is a major commercial redevelopment opposite Liverpool Street station in the City. It is owned by Amsprop, (Alan Sugar's property development business) and provides 41,500 sq ft of Grade A offices and 8,100 sq ft of retail space over seven floors.

While part of the façade of the original building was retained, part was replaced with new stone cladding. Following a competitive tender process, ISG appointed Putney & Wood as the stone contractor. Rolfe Judd specified Belgian Blue limestone for a new plinth, with Portland stone across three storeys above. The development also extended the building vertically by adding six additional floors. Putney & Wood installed 700m² of the Lazonby sandstone to this part-glazed, part-stone new build element of the project.
