

PUTNEY & WOOD LTD

The Stonework Contractor | Contemporary | Traditional

PROJECT PROFILE: Lavington Mansions, Ogle Street, London, W1

- **Client:** Peabody Group and Crown Estate
- **Architect:** TateHindle
- **Main Contractor:** Allenbuild Ltd
- **Stone used:** Portland stone
- **Value:** £440,000
- **Completed:** December 2013
- **Contract duration:** 12 weeks
- **Scope of work:**
External Portland stone cladding

This unique development of 21 new homes is notable not just for its contemporary yet sympathetic design, but also because it is a rare example of an all-affordable housing scheme in the Fitzrovia conservation area, just moments from Oxford Circus.

Putney & Wood was appointed by Allenbuild to carry out the Portland stone cladding package which included the façade of the new 6 story stair core and architectural dressings on the main brickwork elevations. Our design and site installation teams worked closely with Buro Four, TateHindle and Allenbuild to deliver the stone cladding package within a tight budget.

A collaboration between the Crown Estate and Peabody, the development achieves Level 3 Code for Sustainable Homes with layouts meeting 'Lifetime Homes' standards.

"I was impressed with Putney & Wood's work on this project. Their team was professional and courteous and the stonemasons showed a good eye for detail"

Craig Kelly – Allenbuild
