

PUTNEY & WOOD LTD

The Stonework Contractor | Contemporary | Traditional

Environmental Policy

This Policy applies to all activities undertaken by Putney and Wood and impacts on key suppliers and customers. Putney and Wood is a leading designer, supplier, and installer of natural stone for buildings and has a reputation for providing high quality products and services to clients and quality of design.

The organisation is committed to minimising the environmental impact of its operations whenever appropriate in our activities and also protecting the environment, including the prevention of pollution. We involve employees in our environmental programme and provide the necessary training to enable them to discharge their responsibilities and maintain a programme of continual improvement in environmental performance and a commitment to fulfilling compliance obligations.

We engage in dialogue with key suppliers in order to encourage them in the development of environmental best practice. We try to improve energy and other resource efficiency and reduce wastage in all areas of our operations.

This policy forms the foundation of the environmental management system to meet the requirements of ISO 14001:2015 and the basis on which the environmental objectives and targets are structured. The objectives are communicated to staff to ensure that they are aware of any that have a direct relationship to their work.

This policy is appropriate to the purpose and context of the organisation, including the nature, scale, and environmental impacts of activities, products and services and is readily available to interested parties.
